AMENDMENTS TO THE SPECIFICATION:

Page 1, 1st – 2nd paragraphs:

The present invention relates to a foot water-spouting ~~jetting~~ device for spouting water toward a foot and particularly to a foot water-spouting ~~jetting~~ device which spouts ~~[[jets]]~~ water so that sensory receptors existing on the skin are effectively stimulated.

Recently, devices called foot massage devices and the like provided with a container for accommodating feet and a nozzle for spouting ~~jetting~~ water to the feet accommodated in the container have attracted attention with the growing public interest in health.
